

TAKENET

Your IT Full Service Provider.

___OUR TAKENET PHILOSOPHY

TAKENET GmbH is not a system house in the classical sense – we think and act as an **external IT department**.

As a full-service provider we devise the optimum and **tailored IT solution** for your needs. The help we provide is fast and professional – of course also in the form of managed services.

TAKENET means **IT operations of a Group-company quality**. Use TAKENET GmbH as a ramped up extension to your IT team!

We also optionally provide a **dependable complete operation** of your IT environment on the spot or in our TAKENET computer center. For us, **pride of place** is given to the **security, availability and performance** of your corporate data .

With us as your partner, network outages, data losses and non-dependable computers are a thing of the past. After all, TAKENET not only corrects errors but also actively ensures that they do not re-occur.

TAKENET IS IT. WITHOUT A DOUBT!
